

ENERGY AND ENVIRONMENT CABINET

Department for Environmental Protection

Division of Water

(Amended After Comments)

401 KAR 10:026. Designation of uses of surface waters.

RELATES TO: KRS 146.200-146.360, 146.410-146.535, 146.550-146.570, 146.600-146.619, 146.990, 224.01-010, 224.01-400, 224.16-050, 224.16-070, 224.70-100-224.70-140, 224.71-100-224.71-145, 224.73-100-224.73-120, **EO 2008-507, 2008-531**

STATUTORY AUTHORITY: KRS 146.220, 146.241, 146.270, 146.410, 146.450, 146.460, 146.465, 224.10-100, 224.16-050, 224.16-060, 224.70-100, 224.70-110, 40 C.F.R. Part 131, 16 U.S.C. 1271-~~1287~~ [et seq.], 1531-~~1544~~ [et seq.], 33 U.S.C. 1311, 1313, 1314, 1316, 1341

NECESSITY, FUNCTION, AND CONFORMITY: KRS 224.10-100 requires the ~~[Environmental and Public Protection]~~ cabinet to develop and conduct a comprehensive program for the management of water resources and to provide for the prevention, abatement, and control of pollution. This administrative regulation and 401 KAR 10:001, 10:029, 10:030, and 10:031 [~~5:002, 5:029, 5:030, and 5:031~~] establish procedures to protect the surface waters of the Commonwealth, and thus protect water resources. **EO 2008-507 and 2008-531, effective June 16, 2008, abolish the Environmental and Public Protection Cabinet and establish the new Energy and Environment Cabinet.** This administrative regulation applies the designated uses described in 401 KAR 10:031 [~~5:031~~] to the surface waters of the Commonwealth. This administrative regulation also makes all surface waters subject to the general criteria specified in

1 401 KAR 10:031 [~~5:031~~], Section 2. [~~Definitions for terms used in this administrative regulation~~
2 ~~are found in 401 KAR 5:002.~~]

3 Section 1. Scope of Designation. (1) Surface waters listed in this administrative regulation
4 shall be designated for all legitimate uses contained in KRS 224.70-100(1) except as specified in
5 401 KAR 10:031 [~~5:031~~], Sections 5 and 8, or until redesignated in accordance with the
6 procedures of this administrative regulation.

7 (2) Designated uses are:

8 (a) Warm water aquatic habitat;

9 (b) Cold water aquatic habitat;

10 (c) Primary contact recreation;

11 (d) Secondary contact recreation;

12 (e) Domestic water supply; **and** [~~and~~]

13 (f) Outstanding state resource water; **;** **and** [~~;~~]

14 **[(g) Modified warm water aquatic habitat.]**

15 (3) Listed waters shall meet all criteria applicable to their designated uses and those criteria
16 listed in 401 KAR 10:031 [~~5:031~~], Section 2, unless the cabinet grants an exception pursuant to
17 401 KAR 10:031 [~~5:031~~], Section 10 or 11.

18 (4) Outstanding state resource waters may have unique water quality characteristics that shall
19 be protected by additional criteria established in 401 KAR 10:031 [~~5:031~~], Section 8.

20 Section 2. Redesignation of Surface Water Uses. (1) **(a)** Surface waters may be redesignated
21 only upon affirmative findings by the cabinet pursuant to Sections 3 and 4 of this administrative
22 regulation. **(b)** Before redesignating a surface water, the cabinet shall provide notice and an
23 opportunity for a public hearing.

1 (2) In redesignating a surface water, the cabinet shall ensure that its water quality standards
2 provide for the attainment and maintenance of the water quality standards of downstream surface
3 waters.

4 (3) A designated use shall not be removed for a surface water if that use is an existing use, or
5 if the use may be attained by implementing effluent limitations required under Sections 301(b)
6 and 306 of the Clean Water Act, 33 U.S.C. 1311(b) and 1316, and by implementing cost-
7 effective ~~[and reasonable]~~ best management practices for nonpoint source control.

8 (4) If a surface water is designated for a use that is not an existing use, the cabinet shall
9 redesignate the surface water upon demonstration that the designated use is unattainable because:

10 (a) Naturally occurring pollutant concentrations prevent the attainment of the use;

11 (b) Natural, ephemeral, intermittent, or low flow conditions or water levels prevent the
12 attainment of the use, unless these conditions may be compensated for by the discharge of
13 sufficient volume of effluent discharges;

14 (c) Human caused conditions or sources of pollution ~~[that]~~ prevent the attainment of the use
15 and cannot be remedied or would cause more environmental damage to correct than to leave in
16 place;

17 (d) Dams, diversions, or other types of hydrologic modifications preclude the attainment of
18 the use, and it is not feasible to restore the surface water to its original condition or to operate the
19 ~~[such]~~ modification in a way that would result in the attainment of the use;

20 (e) Physical conditions related to the natural features of the surface water, but unrelated to
21 water quality, preclude attainment of the aquatic life use, such as the lack of a proper substrate,
22 cover, flow, depth, pools, or riffles; or ~~[, and the like, unrelated to water quality, preclude~~
23 ~~attainment of the aquatic life use; or]~~

(f) Controls more stringent than those required by Sections 301(b) and 306 of the Clean Water Act, 33 U.S.C. 1311(b) and 1316, would result in substantial and widespread economic and social impact as determined by the guidelines in ["Interim Economic Guidance for Water Quality Standards Workbook"], EPA, March 1995 [~~incorporated by reference in Section 6 of this administrative regulation~~].

(5) Redesignations shall be consistent with the antidegradation provisions of 401 KAR 10:029 and 10:030 [~~5:029 and 401 KAR 5:030~~].

Section 3. Documentation for Redesignations. (1) (a) A person may request redesignation of surface water uses by petition to the cabinet. (b) The petitioner shall provide the cabinet with the documentation required in subsection (3) of this section and shall have the burden of proof that the redesignation is appropriate.

(2) (a) The cabinet may propose redesignations of surface water uses. (b) The cabinet shall provide documentation for those surface waters that it proposes for use redesignation.

(3) Documentation to support the redesignation of a surface water of the Commonwealth shall be:

(a) A United States Geological Survey 7.5 minute topographic map or its equivalent [~~approved by the cabinet~~] showing those surface waters to be redesignated, with a description consisting of a river mile index with existing and proposed discharge points;

(b) Existing uses and water quality data for the surface waters for which the redesignation is proposed. If adequate data are unavailable, additional studies shall [~~may~~] be required by the cabinet;

(c) Descriptions of general land uses and specific land uses adjacent to the surface waters for which the redesignation is proposed;

(d) The existing and designated uses of the downstream waters into which the surface water under consideration discharges;

(e) General physical characteristics of the surface water including width, depth, bottom composition, and slope;

(f) The frequency of occasions when there is no natural flow in the surface water and the 7Q₁₀ and harmonic mean flow values for the surface water and adjacent surface waters;

(g) An assessment of the existing and potential aquatic life habitat in the surface waters under consideration and the adjacent upstream surface waters.

1. The existing aquatic life shall be documented and livestock and natural wildlife dependence on the surface water shall be assessed.

2. The occurrence of individuals or populations, indices of diversity and well-being, and abundance of species of any unique native biota shall be documented;

(h) The proposed designated uses for the surface water in question; and

(i) An explanation of the irretrievable person-induced, or natural conditions that ~~[which]~~ preclude attainment of a higher use designation or an assessment of the substantial and widespread social and economic impacts resulting from the imposition of additional controls necessary for existing point sources, beyond the most stringent effluent limitation levels normally required for the sources.

Section 4. Procedures for Redesignation. (1) For each of the surface waters for which a redesignation is proposed, the cabinet or petitioner shall prepare a fact sheet containing the following information:

(a) The name and address of the petitioner;

(b) The name and sketch or description of the surface water proposed for specified use

redesignations, including the location of existing and proposed dischargers;

(c) The proposed use redesignations;

(d) A brief abstract of the supportive documentation, which demonstrates that the redesignation is appropriate;

(e) The appropriate water quality criteria for the surface water based on the proposed designated use;

(f) The treatment requirements proposed for discharges to the surface water in question if designated for the proposed use; and

(g) A "plain English" summary of the implications of the designation for the community and other users or potential users of the surface water in question.

(2) The cabinet shall document the determination to propose or deny redesignation as a result of a petition, and shall provide a copy of the decision to the petitioner and other interested parties.

Section 5. Surface Water Use Designations. (1) Listed in the tables below are the use designations for specific surface waters of the Commonwealth. The county column indicates the county in which the mouth or outlet of the surface water is located. The identifying symbols for use designations are listed in Table A in this section. [.]

<u>Table A: Use Designation Symbols</u>	
WAH	Warm Water Aquatic Habitat
CAH	Cold Water Aquatic Habitat
PCR	Primary Contact Recreation
SCR	Secondary Contact Recreation
DWS	Domestic Water Supply, applicable at existing points of

	public water supply <u>intake</u> [withdrawal]
OSRW	Outstanding State Resource Water
<u>MWAH</u>	<u>Modified Warm Water Aquatic Habitat</u>

(2) (a) Surface waters not specifically listed in this section are designated for the uses [~~use~~] of warm water aquatic habitat, primary contact recreation, secondary contact recreation and domestic water supply in accordance with Section 1 of this administrative regulation.

(b) [~~Waters where~~] Domestic water supply criteria in 401 KAR 10:031, Section 6 are implemented at locations listed [~~are found~~] in Table B in this section.

2 (3) (a) Table C in this section lists waters that have:

1 1. A designated use of CAH or OSRW; or

2 2. Exceptions to specific criteria in 401 KAR 10:031.

3 (b) All other criteria in 401 KAR 10:031 applicable to the listed use designations shall
4 apply to surface waters listed in Table C in this section.

5 (c)1. DWS use shall apply to all waters listed in Table C in this section.

6 2. DWS use criteria found in 401 KAR 10:031, Section 6, shall apply only at the
7 surface water intakes listed in Table B of this section.

8 ~~[Exceptions to specific criteria in 401 KAR 10:031 [5:031] that apply to particular surface~~
9 ~~waters are shown in Table C [the tables of surface water use designations] in this section. All~~
10 ~~other criteria in 401 KAR 10:031 [5:031] applicable to the listed use designations shall apply~~
11 ~~to these surface waters.]~~

401 KAR 10:026 “Designation of uses of surface waters.” (Amended After Comments) approved for promulgation:

Date

Leonard K. Peters, Secretary
Energy and Environment Cabinet

REGULATORY IMPACT ANALYSIS AND TIERING STATEMENT

Administrative Regulation #: 401 KAR 10:026, Amended After Comments

Contact Person: Sandy Gruzesky, Director

(1) Provide a brief summary of:

- (a) What this administrative regulation does:** This administrative regulation lists the types of designated uses for surface waters of the Commonwealth, provides for redesignation of surface waters, describes the process for redesignation of surface waters, and lists designated uses for specific surface waters of the Commonwealth that have been assigned designated uses.
- (b) The necessity of this administrative regulation:** This administrative regulation is necessary to inform the reader of the types of designated use categories for surface waters of the Commonwealth, to provide for redesignation of surface waters, and to list designated uses assigned to surface waters. The list of designated uses assigned to specific surface waters of the Commonwealth is a reference tool necessary for the reader to identify which designated uses apply to specific surface waters.
- (c) How this administrative regulation conforms to the content of the authorizing statutes:** This administrative regulation conforms to KRS 224.10-100 which requires the cabinet to develop and conduct a comprehensive program for the management of water resources and to provide for the prevention, abatement, and control of pollution. This administrative regulation and 401 KAR 10:001, 10:029, 10:030, and 10:031 establish procedures to protect the surface waters of the Commonwealth and thus manage water resources and prevent water pollution. This administrative regulation also makes all surface waters subject to the general criteria specified in 401 KAR 10:031, Section 2.
- (d) How this administrative regulation currently assists or will assist in the effective administration of the statutes:** This administrative regulation will assist in the effective administration of statutes by providing for redesignation of surface waters and by listing the designated uses assigned to specific waters of the Commonwealth. Having the designated uses listed in this way will enable the reader to know which regulatory criteria relate to which water. This information is supportive to achieving compliance with administrative regulations.

(2) If this is an amendment to an existing administrative regulation, provide a brief summary of:

- (a) How the amendment will change this existing administrative regulation:** This amendment alphabetizes table headings in this administrative regulation. This amendment creates a new table, Table B, which indicates specific locations (latitude/longitude and river mile) of 183 surface water intakes and thus the exact locations where domestic water supply criteria in 10:031, Section 6, are applicable. It adds 233 previously unlisted outstanding state resource waters and removes two (2) previously listed outstanding state resource waters because of faulty location records for federally threatened and endangered species. This amendment also removes seventy-four (74) surface waters from the previous table of Surface Water Use Designations that had only the default uses of Warm Water Aquatic Life, Domestic Water Supply, and Primary and Secondary Contact Recreation so that only waters with non-default uses (Outstanding State Resource Waters and Cold Water Aquatic Habitat) are listed.

- (b) **The necessity of the amendment to this administrative regulation:** This amendment is necessary to more fully protect the Commonwealth's best waters by adding 233 waters to the Outstanding State Resource Water use and removes two (2) previously listed outstanding state resource waters because of faulty location records for federally threatened and endangered species. The amended regulation will be more user-friendly by omitting 74 waters from the table that only have default uses, leaving only those waters with non-default uses in Table B.
- (c) **How the amendment conforms to the content of the authorizing statutes:** This amendment conforms to KRS 224.10-100 that requires the cabinet to develop and conduct a comprehensive program for the management of water resources and to provide for the prevention, abatement, and control of pollution. This amendment and 401 KAR 10:002, 10:029, 10:030, and 10:031 establish procedures to protect the surface waters of the Commonwealth. This amendment applies the standards to protect designated uses described in 401 KAR 10:031 to surface waters of the Commonwealth.
- (d) **How the amendment will assist in the effective administration of the statutes:** This amendment updates waters listed in specific designated uses based on the most recent scientific information. It also adds 233 of the state's best waters to the outstanding State Resource Water use.

(3) List the type and number of individuals, businesses, organizations, or state and local governments affected by this administrative regulation: This administrative regulation applies to designated uses to the surface waters of the Commonwealth. All individuals, businesses, organizations, and governments that use the Commonwealth's surface waters for residential, commercial, industrial, or recreational purposes could be impacted by this regulation. This administrative regulation may affect the wastewater treatment operations of local governments if they will have new or expanded discharges into surface waters of the Commonwealth.

(4) Provide an analysis of how the entities identified in question (3) will be impacted by either the implementation of this administrative regulation, if new, or by the change, if it is an amendment, including:

- (a) **List the actions that each of the regulated entities identified in question (3) will have to take to comply with this administrative regulation or amendment:** The permit limits imposed on dischargers may result in additional or reduced treatment outlays, training costs, and operational changes.
- (b) **In complying with this administrative regulation or amendment, how much will it cost each of the entities identified in question (3):** The costs to comply with this administrative regulation will vary considerably depending on the site location, the type of activity occurring, and other factors. All but nine of the 233 proposed new Outstanding State Resource Waters (OSRWs) are identified as such because of excellent biological communities (fish or macroinvertebrates) as per existing regulatory framework in 401 KAR 10:030 that qualify them as Exceptional waters. The other nine are OSRWs because they contain federally threatened or endangered species. Virtually all of these proposed new OSRWs are in less developed parts of the state with few existing entities that discharge into these waters. There is one revised criterion that applies to all 352 OSRWs, including the 233 new proposed OSRWs. That criterion is a slightly more stringent requirement for dissolved

oxygen (6.0 mg/l versus the existing 5.0 mg/l). The purpose of the new standard is to provide additional protection to the biological community for a critical component (oxygen) of the stream environment. It is anticipated that costs associated with complying with this proposed requirement will be minimal, given that compliance with dissolved oxygen standards can be readily achieved with existing treatment technology. Other existing water quality requirements that may be imposed are anticipated to be the same for exiting discharges into these waters. The agency has existing regulatory authority to require more stringent requirements in specific cases if necessary to protect the quality of the OSRW.

- (c) **As a result of compliance, what benefits will accrue to the entities identified in question (3):** Direct and indirect savings may be realized through reduced drinking water treatment costs, maintenance of good agricultural water, maintenance of fisheries, and healthy recreational waters.

(5) Provide an estimate of how much it will cost the administrative body to implement this administrative regulation:

- (a) **Initially:** This amendment does not change routine procedures involved in managing construction grants, permitting, compliance monitoring, or enforcement. The cabinet does not anticipate additional costs.
- (b) **On a continuing basis:** No major costs are anticipated. The cabinet, in implementing the requirements of this administrative regulation, will internalize associated costs with normal budget appropriations.

(6) What is the source of the funding to be used for the implementation and enforcement of this administrative regulation? The source of revenue will be General Fund, as appropriated by the Kentucky General Assembly, and federal funds. The existing budget for the Division of Water utilizes approximately \$800,000 in general funds and approximately \$240,000 in federal funds to implement this regulation.

(7) Provide an assessment of whether an increase in fees or funding will be necessary to implement this administrative regulation, if new, or by the change if it is an amendment: Fees or funding increases are not anticipated to be necessary to the implementation of this amendment.

(8) State whether or not this administrative regulation established any fees or directly or indirectly increased any fees: These amendments will not establish or increase fees.

(9) TIERING: Is tiering applied? (Explain why or why not)

Yes, tiering is applied in this administrative regulation. Any discharger into a water designated as cold water aquatic habitat will require dischargers into such water to meet requirements outlined in 401 KAR 10:031 that are more stringent than requirements for dischargers into surface water designated warm water aquatic habitat. Any discharger into a water designated as an outstanding resource water by this administrative regulation will also have special requirements as outlined in 401 KAR 10:031. Waters listed in Table B as having a surface water intake will have Domestic Water Supply criteria found in 401 KAR 10:031 Section 6.

FISCAL NOTE ON STATE OR LOCAL GOVERNMENT

Regulation #: 401 KAR 10:026

Contact Person: Sandy Gruzesky, Director

- 1. Does this administrative regulation relate to any program, service, or requirements of a state or local government (including cities, counties, fire departments, or school districts)?**

Yes X No

If yes, complete questions 2-4.

- 2. What units, parts or divisions of state or local government (including cities, counties, fire departments, or school districts) will be impacted by this administrative regulation?**

This administrative regulation applies to designated uses to the surface waters of the Commonwealth. All governments that use the Commonwealth's surface waters for residential, commercial, industrial, or recreational purposes could be impacted by this regulation. This administrative regulation may affect the wastewater treatment operations of local governments if they will have discharges into surface waters of the Commonwealth that have been re-designated by this amended regulation.

- 3. Identify each state or federal statute or federal regulation that requires or authorizes the action taken by the administrative regulation.**

40 C.F.R. Part 131, 16 U.S.C. 1271-1287, 1531-1544, 33 U.S.C. 1311, 1313, 1314, 1316, 1341

- 4. Estimate the effect of this administrative regulation on the expenditures and revenues of a state or local government agency (including cities, counties, fire departments, or school districts) for the first full year the administrative regulation is to be in effect.**

(a) How much revenue will this administrative regulation generate for the state or local government (including cities, counties, fire departments, or school districts) for the first year? No new revenue will be generated.

(b) How much revenue will this administrative regulation generate for the state or local government (including cities, counties, fire departments, or school districts) for subsequent years? No new revenue will be generated.

(c) How much will it cost to administer this program for the first year? There will be no costs

(d) How much will it cost to administer this program for subsequent years? There will be no cost.

Note: If specific dollar estimates cannot be determined, provide a brief narrative to explain the fiscal impact of the administrative regulation.

Revenues (+/-):

Expenditures (+/-):

Other Explanation:

This amended administrative regulation sets forth instream uses designated by the cabinet that in combination with criteria found in 401 KAR 10:031 provide for protection of water quality of the state's waters. Local governments will be required to discharge effluents which assure attainment of the receiving surface water's designated uses. The costs or savings of this amended administrative regulation would ordinarily be passed through to users; however, a local

government that owns a public wastewater treatment system could elect to absorb some or all of the costs or savings. Criteria that apply to these re-designations found in this administrative regulation will be implemented at the time of permit issuance at existing facilities and new dischargers and expanded facilities will comply with the revisions. Local governments withdrawing drinking water from these waters may have lower treatment costs because these waters have lower pollutant loads. Additional costs may be incurred where criteria are more stringent than before or where new criteria are established and less costs may be incurred where criteria are less stringent than previously or where criteria have been eliminated.

FEDERAL MANDATE ANALYSIS COMPARISON

Administrative Regulation#: 401 KAR 10:026

Contact Person: Sandy Gruzesky, Director

1. Federal statute or regulation constituting the federal mandate.

There is no federal statute or regulation mandating that Kentucky implement a water pollution control program. For Kentucky to maintain its delegation over the NPDES permit program, the Clean Water Act requires that Kentucky review its water quality standards every three years and comply with the programmatic requirements of 40 C.F.R. Part 131.

2. State compliance standards.

401 KAR 10:001, 10:026, 10:029, 10:030, and 10:031, the water quality standards regulations.

3. Minimum or uniform standards contained in the federal mandate.

The Clean Water Act requires designated uses, criteria, standards and antidegradation policies in water quality standards.

4. Will this administrative regulation impose stricter requirements, or additional or different responsibilities or requirements than those required by the federal mandate?

No. Federal regulation 40 C.F.R. 131.10 requires states to take into consideration the value of public water supply, protection and propagation of fish, shellfish, and wildlife, and recreation in and on the water. Some higher quality waters (Outstanding State Resource Waters, or OSRW) require additional measures to protect that quality. Thus, Kentucky's structure of designated uses is not more stringent than federal. Most states have regulations similar to Kentucky's designated uses: aquatic life, human health for drinking water and consumption of fish tissue, recreation, and a category similar to our OSRW, and have had these uses approved by EPA. EPA is promoting and has published a guidance document on the concept of a tiered aquatic life use framework, which Kentucky is proposing by adding more excellent waters to the OSRW use.

5. Justification for the imposition of the stricter standard, or additional or different responsibilities or requirements.

There are no stricter standards or additional or different responsibilities or requirements. Please see the agency's response to question #4.
